

数据持久化的一种方式: pickle模块

作用: 持久保存对象, 将list、tuple、dict、set等数据进行序列化存储到文件

常用的两个方法:

`pickle.dump:`

将数据持久化保存

格式: 例子

```
users = {"6666666":{"name":"sunck","idCard":"6666666","cards":{"1":{"cardId":"1","passwd":"1","money":"1"}}}}
with open("users.txt", "wb") as fp:
    pickle.dump(users, fp)
```

`pickle.load:`

将数据读取出来, 可用变量接受

格式: 例子

```
with open("users.txt", "rb") as fp:
    users = pickle.load(fp)
```
