

安装autopep8自动排版代码+PyCharm设置

1. 安装Autopep8

使用cmd命令行，输入

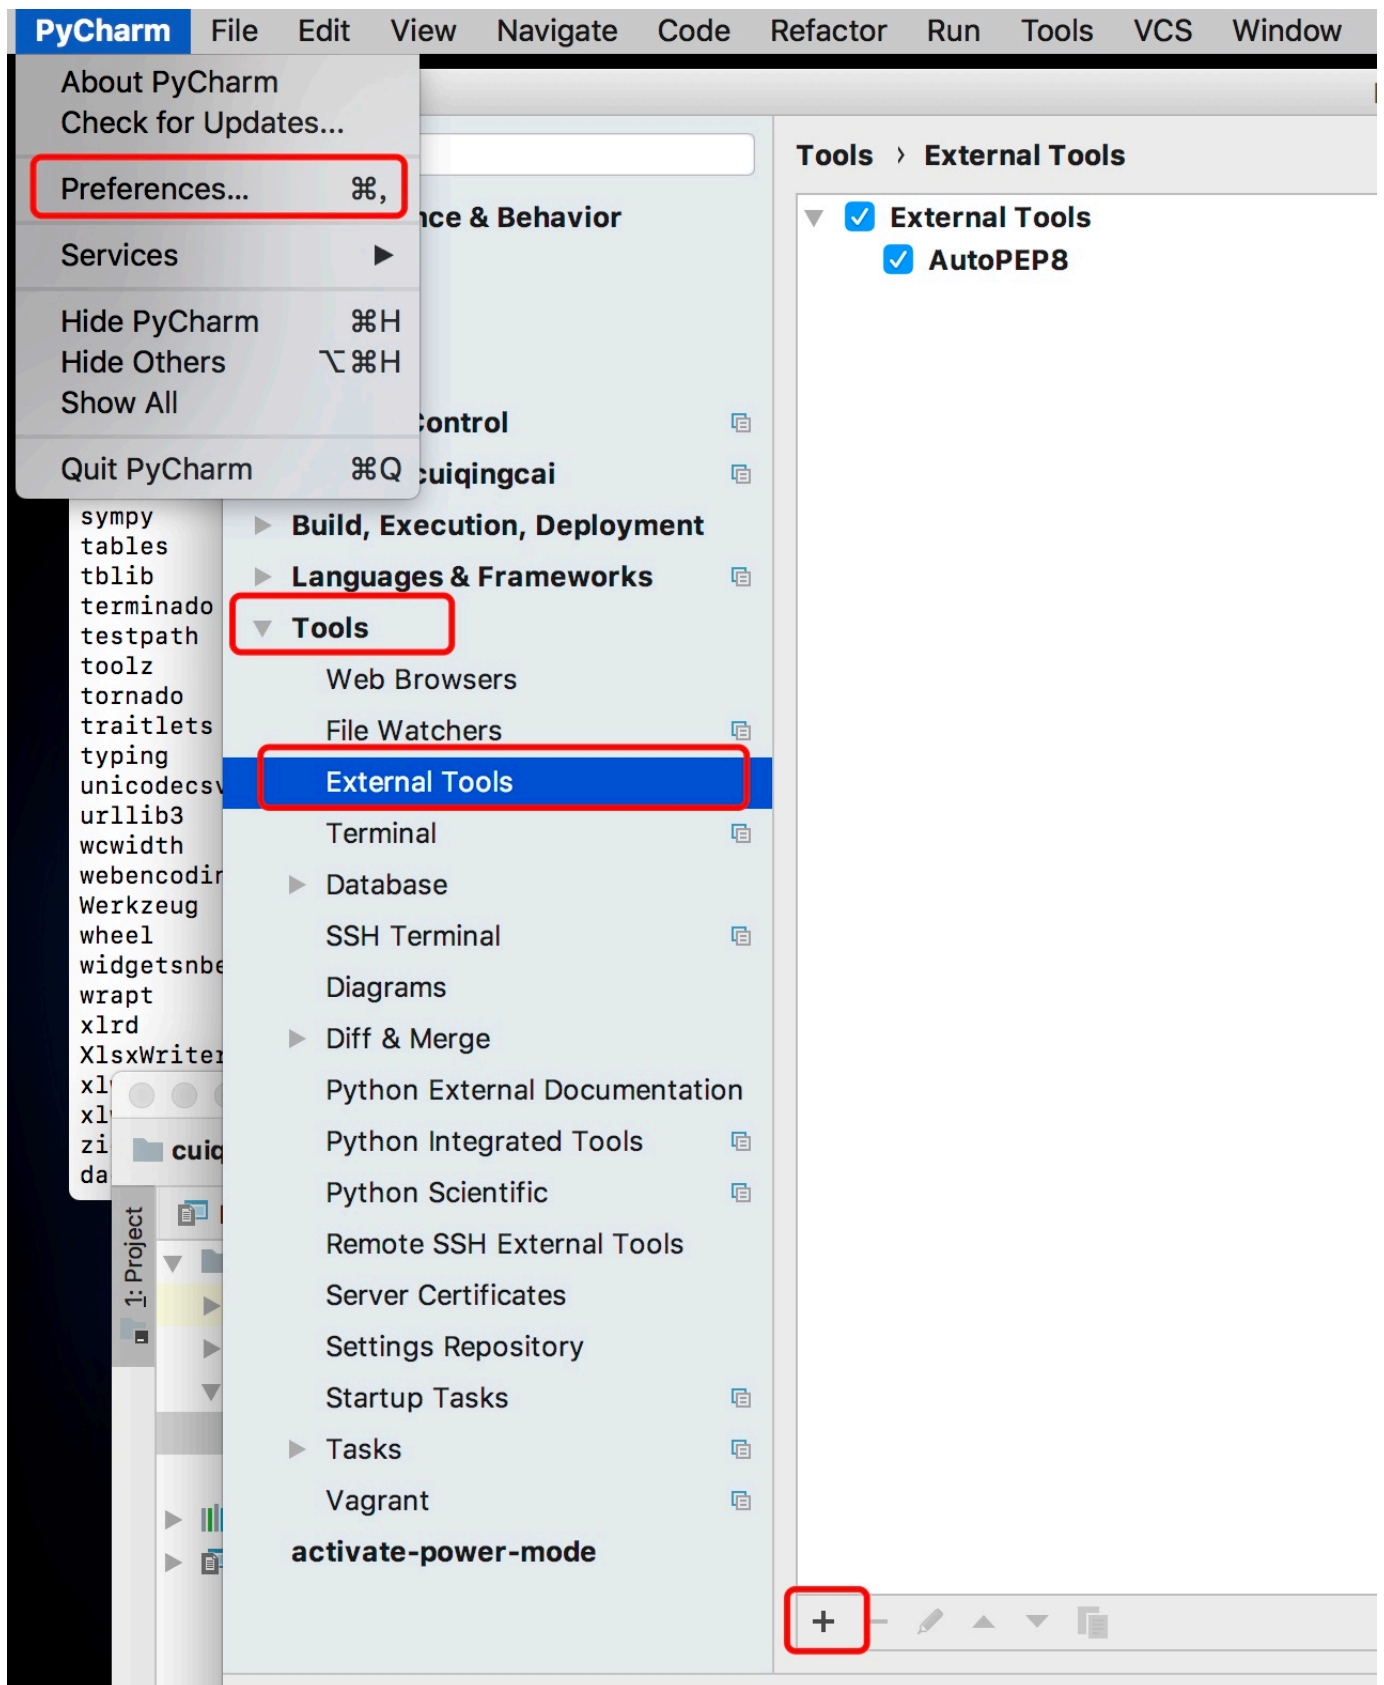

```
1 | pip install autopep8
```

2. 在PyCharm中配置Autopep 8

- 本文中使用的PyCharm版本是：

```
1 | PyCharm 2018.1.4 (Professional Edition)
2 | Build #PY-181.5087.37, built on May 24, 2018
3 | Licensed to Bin youcai
4 | Subscription is active until March 31, 2019
5 | For educational use only.
6 | JRE: 1.8.0_152-release-1136-b39 x86_64
7 | JVM: OpenJDK 64-Bit Server VM by JetBrains s.r.o
8 | macOS 10.13.5
```

- PyCharm → Preferences → Tools → External Tools → 点击加号

- 在Creat Tool配置页面做如下设置：

Edit Tool

Name: Group:

Description:

Tool Settings

Program: ...

Arguments: ...

Working directory: ...

Show in: ☒ Main menu ☒ Editor menu ☒ Project views ☒ Search result

▼ Advanced Options

☒ Synchronize files after execution

☒ Open console for tool output

☐ Make console active on message in stdout

☐ Make console active on message in stderr

Output filters:

Each line is a regex, available macros: \$FILE_PATH\$, \$LINE\$ and \$COLU...

```

1 > Name: AutoPEP8 (也可以是其他名字)
2 > Program: autopep8
3 > Arguments: `--in-place --aggressive --aggressive $FilePath$`
4 > Working directory: `$ProjectFileDir$`
5 > Output filters: `$FILE_PATH$\\:$LINE$\\:$COLUMN$\\:.*`
6 > 完成后点击OK, 在Settings界面点击Apply。

```

- 在代码界面使用：
将鼠标放在的编辑器中 → 右键 → External Tools → 点击autopep8。
